Eartec Office Pro 710V

Monaural Flex Boom Headset

The Eartec Office 710V Headset provides you with the freedom to increase or decrease speaker volume of the headset in any office environment; using your in line controller. It further offers you the ability to mute your microphone with ease and comfort of not having to stretch over to put the call on hold.

The Eartec Office 710V Headset has a sleek and refined Obsidian black exterior, an ultra-light weight body yet robust build.

A highly sensitive Neodymium Magnet System for accurate sound reproduction and audio balance. The 700 series are all incorporated with a two tier noise cancelling system to promote your telephony experience and ultimately increase productivity in your day to day business.
